

Safe Motherhood Day

On 11th April, 2015 we organized a camp for the expecting mothers in our labour force.

The objective was to motivate the expecting mothers on early registration, immunization, institutional delivery, to maintain personal hygiene, breast care, breast feed, baby care, to avoid certain traditional practices that are detrimental to the health of babies. Family Planning (Spacing method), proper care and nutrition for pregnant mothers were few other topics that were discussed.
